

SILAGE BAGGING SOLUTIONS

Mini Silage Bagger Equipment

SILAGE BAGGING SOLUTIONS

Mini Silage Bagger

Our Mini silage baggers is an innovative agricultural machine very efficient, affordable, reliable and easy maintenance.

It is designed to the production and storage of animal feed (silage and haylage) in small reusable silage bags (26"x 44", 3.5 mil thickness, UV protection) that stores 55 lbs on average of fresh corn silage on each bag for up to 1 year.

works with a 6.5HP small gas engine, EPA certified.

Productivity: a thousand lbs per hour on average. Automatic shut off of the machine.

Agitators to avoid clogged product on the inlet/outlet.

Our double screw system performs uniform compaction in the bag.

With 1- 1/4 shaft, it has more strength and durability.

has a mixer to prevent clogging of the silo.

SILAGE BAGGING SOLUTIONS

Machine is all made of steel (no plastic parts on the frame and hopper).
Wheels: we use low speed pneumatic tube tires.
Compaction adjustment system. (can be adjusted to increase or decrease compaction)

Silage bags making has a very good demand as it has proved to be very nutritive feed for all ruminants (sheep, goats, horses, alpacas, bulls and cows) animals during fresh forage shortage. Bags can be reused and feed is preventing from spoiling. They are easily filled with our equipment and can be stocked in piles indoor or outdoor providing UV protection and puncture resistance. After sealed the bag can last up to 1 year.

Technical data	Unit
Width	4ft
length	7ft
height	4ft
Weight	150KG
Gasoline engine	6.5HP
Diameter bag	26"

We are dedicated to produce reliable farming equipment to small farms and we offer three different silage bagging solutions.

Not only small farms from Canada and USA are working with our equipment, farms in Asia, Central America and Europe have taken the advantages of working with our silage bagging solutions as well.

Our machines are made simple and easy to use.
